Make your  
swimming pool  
fashionable

If you want an attractive pool that will give you no problems, RENOLIT ALKORPLAN reinforced liner is the perfect product to achieve this

Reinforced membranes are the most widely-used pool liners in the world

We offer you the pool of your dreams

GUARANTEE  
WATERTIGHTNESS

**10** YEARS

With RENOLIT ALKORPLAN this won't happen ...!

Minimum maintenance... and very easy to clean!

- No more detached mosaic tiles.
- No more black joints.
- No more flaking paintwork.

No matter what your garden looks like RENOLIT ALKORPLAN allows you to create an unique, customised area just for you.

**RENOLIT ALKORPLAN** is the only reinforced liner that can guarantee the waterproofing of your pool, regardless of its location.

**GUARANTEE  
WATERTIGHTNESS  
10 YEARS**

**RENOLIT ALKORPLAN** allows you to enjoy your pool in peace, without worrying about leaks.

Compatible with almost any material!

How many reinforced pool liners are able to overcome this test?

**RENOLIT ALKORPLAN** is the perfect liner for rooftop pools, basement pools or in any place where there are cracks or micro pores that could cause damp, water leaks or flooding.

The perfect  
solution for  
large pools

The ideal lining  
for both commercial  
and residential  
pools

Many hotel pools, Olympic pools or aquatic park pools in Europe have **RENOLIT ALKORPLAN** liners installed in them, as apart from requiring minimum maintenance, they guarantee complete water-tightness and it is possible to install them in half the time it takes to install other systems.

- It can be installed on any surface.
- Clean installation, with no noise and in half the time it takes to install other liners.
- It requires practically no maintenance.
- No matter the size and shape of the pool.

Although the installation of RENOLIT ALKORPLAN is fast and easy, it should always be installed by qualified professionals to ensure a completely watertight finish.

If you have any questions or need more information, please contact us at

*Pools with modern, spectacular designs, with brilliant glints, that will be the most prized jewel in your garden.*

No detached tiles or crumbling grouting!!

Ideal for new pools and for renovations!

It is installed over the existing substrate in half of the time than other linings.

It guarantees the watertightness for 10 years with minimal maintenance!

## RENOLIT ALKORPLAN CERAMICS

It looks like... but isn't!

RENOLIT ALKORPLAN CERAMICS, a 2mm embossed pool liner for swimming pools with the aesthetic appeal and texture of the mosaic tiled designs of Greek Myths.

With the most careful aesthetics and with many advantages over any existing pool liner in the market:

- 1 Guaranteed watertight.
- 2 Quick and easy installation compared to glass mosaic tiling.
- 3 No fallen tiles or crumbling grout.
- 4 Minimum maintenance.
- 5 The 2mm thickness creates a more durable and resilient membrane.
- 6 Easy to weld with an immaculate finish.

## RENOLIT ALKORPLAN CERAMICS Selene

Selene

RENOLIT ALKORPLAN CERAMICS Width Thickness Ref.  
Selene 1.65 m 2 mm 35617203

*Selene, moon white, will captivate those who contemplate its celestial waters as the colour of the sky on a summer day.*

# RENOLIT ALKORPLAN CERAMICS Etna

 **Etna**  
RENOLIT ALKORPLAN CERAMICS Width Thickness Ref.  
Etna 1.65 m 2 mm 35617204

*With sober and elegant nuances, Etna makes the pools spectacular and formidable.*

## RENOLIT ALKORPLAN CERAMICS Sofia

Sofia

RENOLIT ALKORPLAN CERAMICS Width Thickness Ref.  
Sofia 1.65 m 2 mm 35617201

*Of a totally new colour in the world of swimming pools,  
it offers a delicate and subtle turquoise spectacle.*

Atenea

RENOLIT ALKORPLAN CERAMICS Width Thickness Ref.  
Atenea 1.65 m 2 mm 35617202

*Of an intense blue, so warm, so deep and so ours.  
Atenea gives the water a shine and a unique hue.*

# RENOLIT ALKORPLAN TOUCH

Elegance

Reinforced liner with exclusive 3D designs and prints, inspired by nature.

RENOLIT ALKORPLAN TOUCH reinforced membrane reproduces natural textures and gives personality and character to pool linings, making them unique and original.

It's the pool liner revolution!

RENOLIT ALKORPLAN  
**TOUCH**

Are you aware of  
RENOLIT ALKORPLAN TOUCH?

The reinforced membrane RENOLIT ALKORPLAN TOUCH fulfills the two fundamental objectives of a swimming pool:

- ① Assure a completely watertight structure.
- ② The most beautiful finish possible.

The reinforced membrane is the most visible element and will make your pool absolutely unique and exclusive.

RENOLIT ALKORPLAN TOUCH protects your garden and home against possible flooding by pool water. Even if the substructure is cracked, the water will always remain where it should be ... in the pool.

In addition, the relief designs of RENOLIT ALKORPLAN TOUCH give character to any pool and allow you to create a unique and individual space in your garden.

Elegance

# RENOLIT ALKORPLAN TOUCH

Reinforced liner with exclusive 3D designs and prints, inspired by nature

You will turn your home into a haven of design and character

RENOLIT ALKORPLAN TOUCH is the first reinforced membrane with a heavily riven stone finish. At 2mm thick it is the strongest and most resistant liner in the market. The imaginative design of the liner makes it the most appropriate element for adding a personal note to your pool and making your home a unique place. The TOUCH liners emulate nature through adding a simulated stone finish to exotic baths, adding personality and singularity to the pools in which they are used, making each pool unique.

You will have a unique and exclusive pool!

# RENOLIT ALKORPLAN TOUCH Authentic

RENOLIT ALKORPLAN TOUCH	Width	Thickness	Ref.
Authentic	1.65 m	2 mm	35517402

*Rustic pools with exquisite stone textures, creating different tones in the water, brilliant and colourful, perfect for natural settings or country gardens.*

# RENOLIT ALKORPLAN TOUCH Relax

RENOLIT ALKORPLAN TOUCH	Width	Thickness	Ref.
Relax	1.65 m	2 mm	35517401

*Sensual, exotic pools with golden sand and brilliant turquoise reflections, that will take you to the remote beaches of the Caribbean.*

# RENOLIT ALKORPLAN TOUCH Elegance

RENOLIT ALKORPLAN TOUCH	Width	Thickness	Ref.
Elegance	1.65 m	2 mm	35517301
Elegance Non-Slip	1.65 m	1.8 mm	81122401

Luxurious, seductive, unique pools in deep blue tones that will captivate you at first sight and turn your home into an elegant palace.

# RENOLIT ALKORPLAN TOUCH Vanity

RENOLIT ALKORPLAN TOUCH	Width	Thickness	Ref.
Vanity	1.65 m	2 mm	35517409

*Spectacular, ostentatious white Marble Swimming Pools  
that will be the Pride of the Owners.*

# RENOLIT ALKORPLAN TOUCH Sublime

RENOLIT ALKORPLAN TOUCH	Width	Thickness	Ref.
Sublime	1.65 m	2 mm	35517407

*Imitative of travertine limestone that creates pools with warm reflections ideal for exclusive and naturalist settings.*

# RENOLIT ALKORPLAN TOUCH Prestige

RENOLIT ALKORPLAN TOUCH	Width	Thickness	Ref.
Prestige	1.65 m	2 mm	35517403

*A liner that creates a pool which invokes a volcanic rock paradise, conceived for designer and minimalist settings.*

## Butt welding

RENOLIT recommends to practice the Butt Welding on the pool floor on TOUCH and CERAMICS membranes for an impeccable finish of your pool.

Aesthetically, especially in swimming pools made with RENOLIT ALKORPLAN TOUCH or RENOLIT ALKORPLAN CERAMICS membranes with Butt welding in the pool floor, the welds become practically invisible.

NOT ALL GEOTEXTILES ARE THE SAME!!

RENOLIT ALKORPLAN geotextile is an exclusive RENOLIT fungicide felt that is installed under the membrane to protect it from any irregularities that the surface of the pool may have and make the bathers steps more comfortable.

**NOT  
ALL GEOTEXTILES ARE  
THE SAME!!**

RENOLIT ALKORPLUS geotextile is made of blue polypropylene, which is rot-proof, and always marked with the RENOLIT ALKORPLUS brand.

Advantages:

- 1 The fungicide treatment prevents the proliferation of bacteria under the membrane.
- 2 The geotextile disguises any small imperfection that may exist in the structure of the substrate under the membrane.
- 3 Adds a much more comfortable feel for the bather.
- 4 Helps to maintain the temperature of the pool water.
- 5 Plays a key role in the butt welding system.

Reference	Width (m)
81006005	1.50 *
81006006	1.65
81006007	2.00

\*Specific for butt welding.

# Advice for conserving your RENOLIT ALKORPLAN liner

**Carry out a daily test to ensure the chlorine level is 1ppm and that the pH is between 7.0–7.6**

If you disinfect your swimming pool with chlorine or with a salt electrolysis machine it is essential that the level of the chlorine is 1ppm and the pH level is between 7.0 and 7.6.

If you disinfect with bromide the level should be 1ppm and the pH level between 7 and 8. Excessive use of bromide can cause the liner to become brown in colour.

**If the pool has a salt chlorinator you must add stabilizer at the beginning of the season**

The chlorine generated by the saline electro chlorinator is stronger than normal chlorine.

To dilute add 30ppm of a isocyanuric acid stabilizer at the beginning of the swimming pool season and check daily that level of chlorine at 1ppm and the pH between 7.0 and 7.6.

If your saline electro chlorinator does not have a RedOx chlorine controller you should use a measuring gauge. Even if your pool is equipped with an automatic Redox control it is necessary to manually check the chlorine on a very regular basis (daily).

This prevents the chlorinator producing more chlorine than necessary, which could bleach the liner and irritate eyes.

**It is necessary that the TA level is maintained between 100 and 175ppm**

TA (total alkalinity) represents the water's capacity for neutralising acids. A balanced TA level keeps pH from fluctuating and getting out of control. A TA level under 100 ppm turns water corrosive. Damage to the liner would be irreversible.

We recommend checking the PA level weekly or after rainfall.

**Protect your swimming pool in summer and winter and do not empty it**

Swimming pools are built to be full of water. They should not be left empty for long periods of time.

In the summer keep the water level constant.

In winter protect skimmers and filter systems against frost. Ask a pool specialist for the best winter treatment to keep the water in perfect condition the following season. Above all cover the swimming pool in winter.

Water from wells, or of unknown origin should be analysed and, if necessary, treated before it is used to fill or top up the pool

If the water does not come for the mains supply or from a guaranteed tanker it is very probable that the water will contain diluted metals such as iron, copper or magnesium.

These minerals can react with the chemical products and produce stains on the liner. If this happens ask a specialist to carry out a treatment with RENOLIT ALKORPLUS Antistain.

**No chemical products should come into direct contact with the liner**

The correct and safest way of introducing any chemical product into the swimming pool is by using the skimmer with the circulation pump working.

If it is powder, granules or liquid and it is required to be put directly into the swimming pool, it must be diluted before in a bucket of water, and poured into different areas of the swimming pool. The circulation pump must always be in use to prevent concentration of a product in one area.

Avoid the use of floating dispensers because they can spend too much time in the same position and can bleach the liner.

**Do not use chemical products which contain copper**

Always read the level of the composition of the chemical products that you use, especially those for algae.

Some anti-algae products contain copper sulphate, these should be avoided.

Use anti-algae with a quaternary ammonia base. These are the best products for your hair and your skin. If by accident you have used a product containing copper, you should apply RENOLIT ALKORPLUS Antistain.

**Avoid a build up of dirt and calcareous deposits on the waterline**

The lacquer that protects the RENOLIT ALKORPLAN laminate will repel dirt; however, low maintenance and high bathing loads will accelerate the build up of waterline deposits.

Regular cleaning of the waterline with RENOLIT ALKORCLEAN applied with a sponge or cloth will prevent the build up of grease and scale and avoid permanent staining.

**Never use abrasive tools or aggressive cleaning products**

Do not use aggressive chemical products or cleaning equipment, such as solvents; brushes with wire or stiff bristles; and abrasive pads or cloths that will damage the membrane. The liner is coated with a protective lacquer which is stain and dirt resistant, however it may be damaged if cleaned with abrasive materials or solvents.

RENOLIT ALKORCLEAN is an ideal and efficient cleaner for your liner. It may be ordered through your Swimming Pool Specialist.
